NIGORI SAKE 濁り酒

This ever-popular category of sake represents the famous “cloudy” or “milky” sakes. Unfiltered “Nigori” sake is a brew that has been coarsely filtered to allow the unfermented rice particles to remain in the sake to increase feeling and flavor. Always served chilled Nigori sake is a popular bar sake that pairs well with international spicy fare and appeals to those looking for direct flavors.

SPARKLING SAKE - HAPPO 発泡酒

Sparkling sake is made with the same process as classic sake up to a point. Fermentation is halted earlier than usual, when the alcohol is only around 5 to 10 percent, as opposed to the 18 to 20 percent of normal sake. At this time, there is still plenty of sugar in the mash. The sake is then pressed and bottled. In the bottle, a secondary fermentation takes place that produces carbonation.
