SPARKLING SAKE - HAPPO 発泡酒

Sparkling sake is made with the same process as classic sake up to a point. Fermentation is halted earlier than usual, when the alcohol is only around 5 to 10 percent, as opposed to the 18 to 20 percent of normal sake. At this time, there is still plenty of sugar in the mash. The sake is then pressed and bottled. In the bottle, a secondary fermentation takes place that produces carbonation.
